

The Florida Keys Wild Bird Rehabilitation Center, Inc.

Organization: Florida Keys Wild Bird Rehabilitation Center

Location: Mission Wild Bird & Laura Quinn Wild Bird Sanctuary, Tavernier, Florida, United States

Exemption Status: Exempt

The mission of the Florida Keys Wild Bird Rehabilitation Center is to rescue, rehabilitate, and release native and migratory wild birds that have been harmed or displaced, to provide or locate a humane shelter for those birds that cannot be released, and to educate the public towards the importance of coexistence with all wild bird species.

Job Title: Wildlife Rehabilitator

Reports to: Rehabilitation Manager

Supervises: Apprentice Rehabilitator and Avian Care Interns (up to four at one time)

Job Summary:

The Wildlife Rehabilitator assists the Rehabilitation Manager in all aspects of avian emergencies, critical care, and daily husbandry of all hospital patients and sanctuary residents. They coordinate the rescue, treatment, and diet plans of all hospital patients. They ensure proper diets, enrichment, general care, and medical treatment for the sanctuary's permanent residents. They are responsible for the training and mentoring of interns and volunteers. This is a full-time, salaried position and includes some holidays, weekends, evening, and event hours.

Essential Duties/Responsibilities:

- Assist in ensuring compliance with U.S. Fish and Wildlife Service (USFWS) and Florida Fish and Wildlife Conservation Commission (FWC) permits and regulations for the rescue and rehabilitation of wild birds.
- Assist in ensuring compliance with USFWS and FWC permits and regulations for the educational display of the non-releasable birds at the sanctuary.
- Plan and administer medical treatments for each patient throughout the rehabilitation process. This includes but is not limited to: appropriate triage, emergency care, housing, and food items for all birds.
- Independently conduct basic medical procedures/treatments (i.e. radiographs, medication dosage, humane euthanasia, fracture stabilization, wound management, etc.) with regards to skill limitations.
- Train and manage interns and volunteers in bird care. Teach routine medical procedures (tube feedings, fluid therapy, wound management, medications) and basic knowledge of species in all aspects of rescue, rehab and release. Provide interns and volunteers with training materials, hands-on lessons, workshops, and safety equipment needed to complete tasks at hand.
- Be available three to four days per week to answer any after-hours bird related questions that the intern on-call may have.
